US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

1) Unduplicated counts are derived through Probabilistic Population Estimation (PPE) on a client file that includes all clients on the CMHC and state hospital caseload for FY2004. 2) Living situation reporting is required at intake, at annual update and at discharge. Figures are based on the latest "living situation" reported. Vermont MH Authority is not responsible for children's RTCs. Crisis Beds are temporary and not recorded as a "living situation".

Adults Served in with Known Employment Status excludes persons for whom employment status was unknown.

MH Consumers Employed as % of Total Adults Served uses Adults Served as the denominator.

MH Consumers Employed as % of Adults served in Labor Force uses persons employed or Unemployed as the denominator.

This table uses data from URS/DIG Table 4.

State Notes:

Age None

Gender Employment status for adults with SMI is based on data linkage with the state Department of Employment and Training database for FY2004. 3 Employment status for other mental health clients is based on case manager reports from monthly service reports. Reporting of employment is required at intake, at annual update and at discharge. The most current status is reported in this table.

Overall Unduplicated counts for the start of the reporting period are derived through Probabilistic Population Estimation (PPE) on a client file that includes all clients on the CMHC caseload during FY2004.
